FELIX™

Dynamic and energetic, FELIX creates compelling spaces. The smooth rounded corners soften the edgy triangle shape. A hollow frame with a narrow one-inch profile is perfect for building spectacular configurations that delight, whether suspended or patterned on a surface. Add an extra layer of texture with acoustic panels that control sound reflection and make the room experience comfortable.

Due to its narrow profile, hollow form, and triangular shape, FELIX fits smaller spaces where the design calls for broader reach with a lightweight feel.

Power over Suspension carries the sleek aesthetic and the injection moulded corners allow for a tight radius.

FELIX communicates dynamism and energy. Its hollow shape lends itself to large spectacular configurations without overpowering the space.

# SUSPENSION OPTIONS

VERTICAL

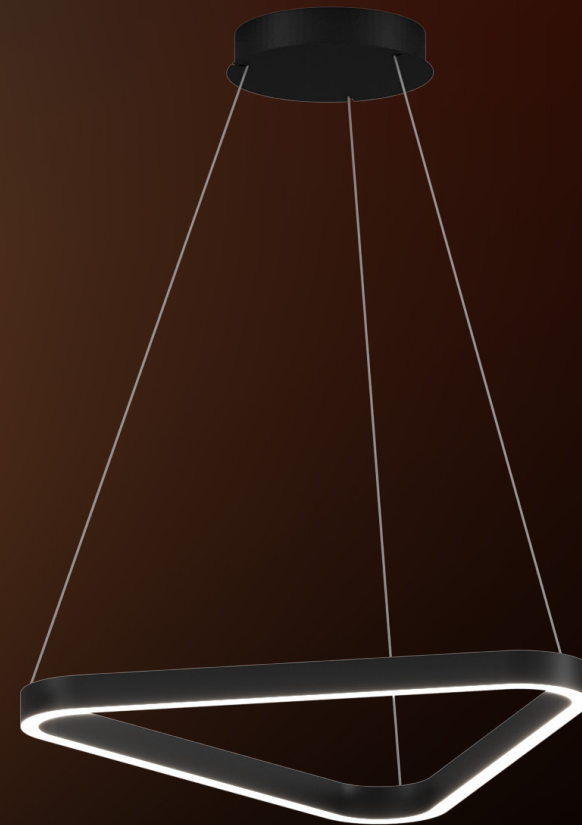

HUB

Offset Power Cord

Power over Suspension  
Integral Driver

Power over Suspension  
Remote Driver

SURFACE MOUNT

Arrange in multiples to create a compelling ceiling design.

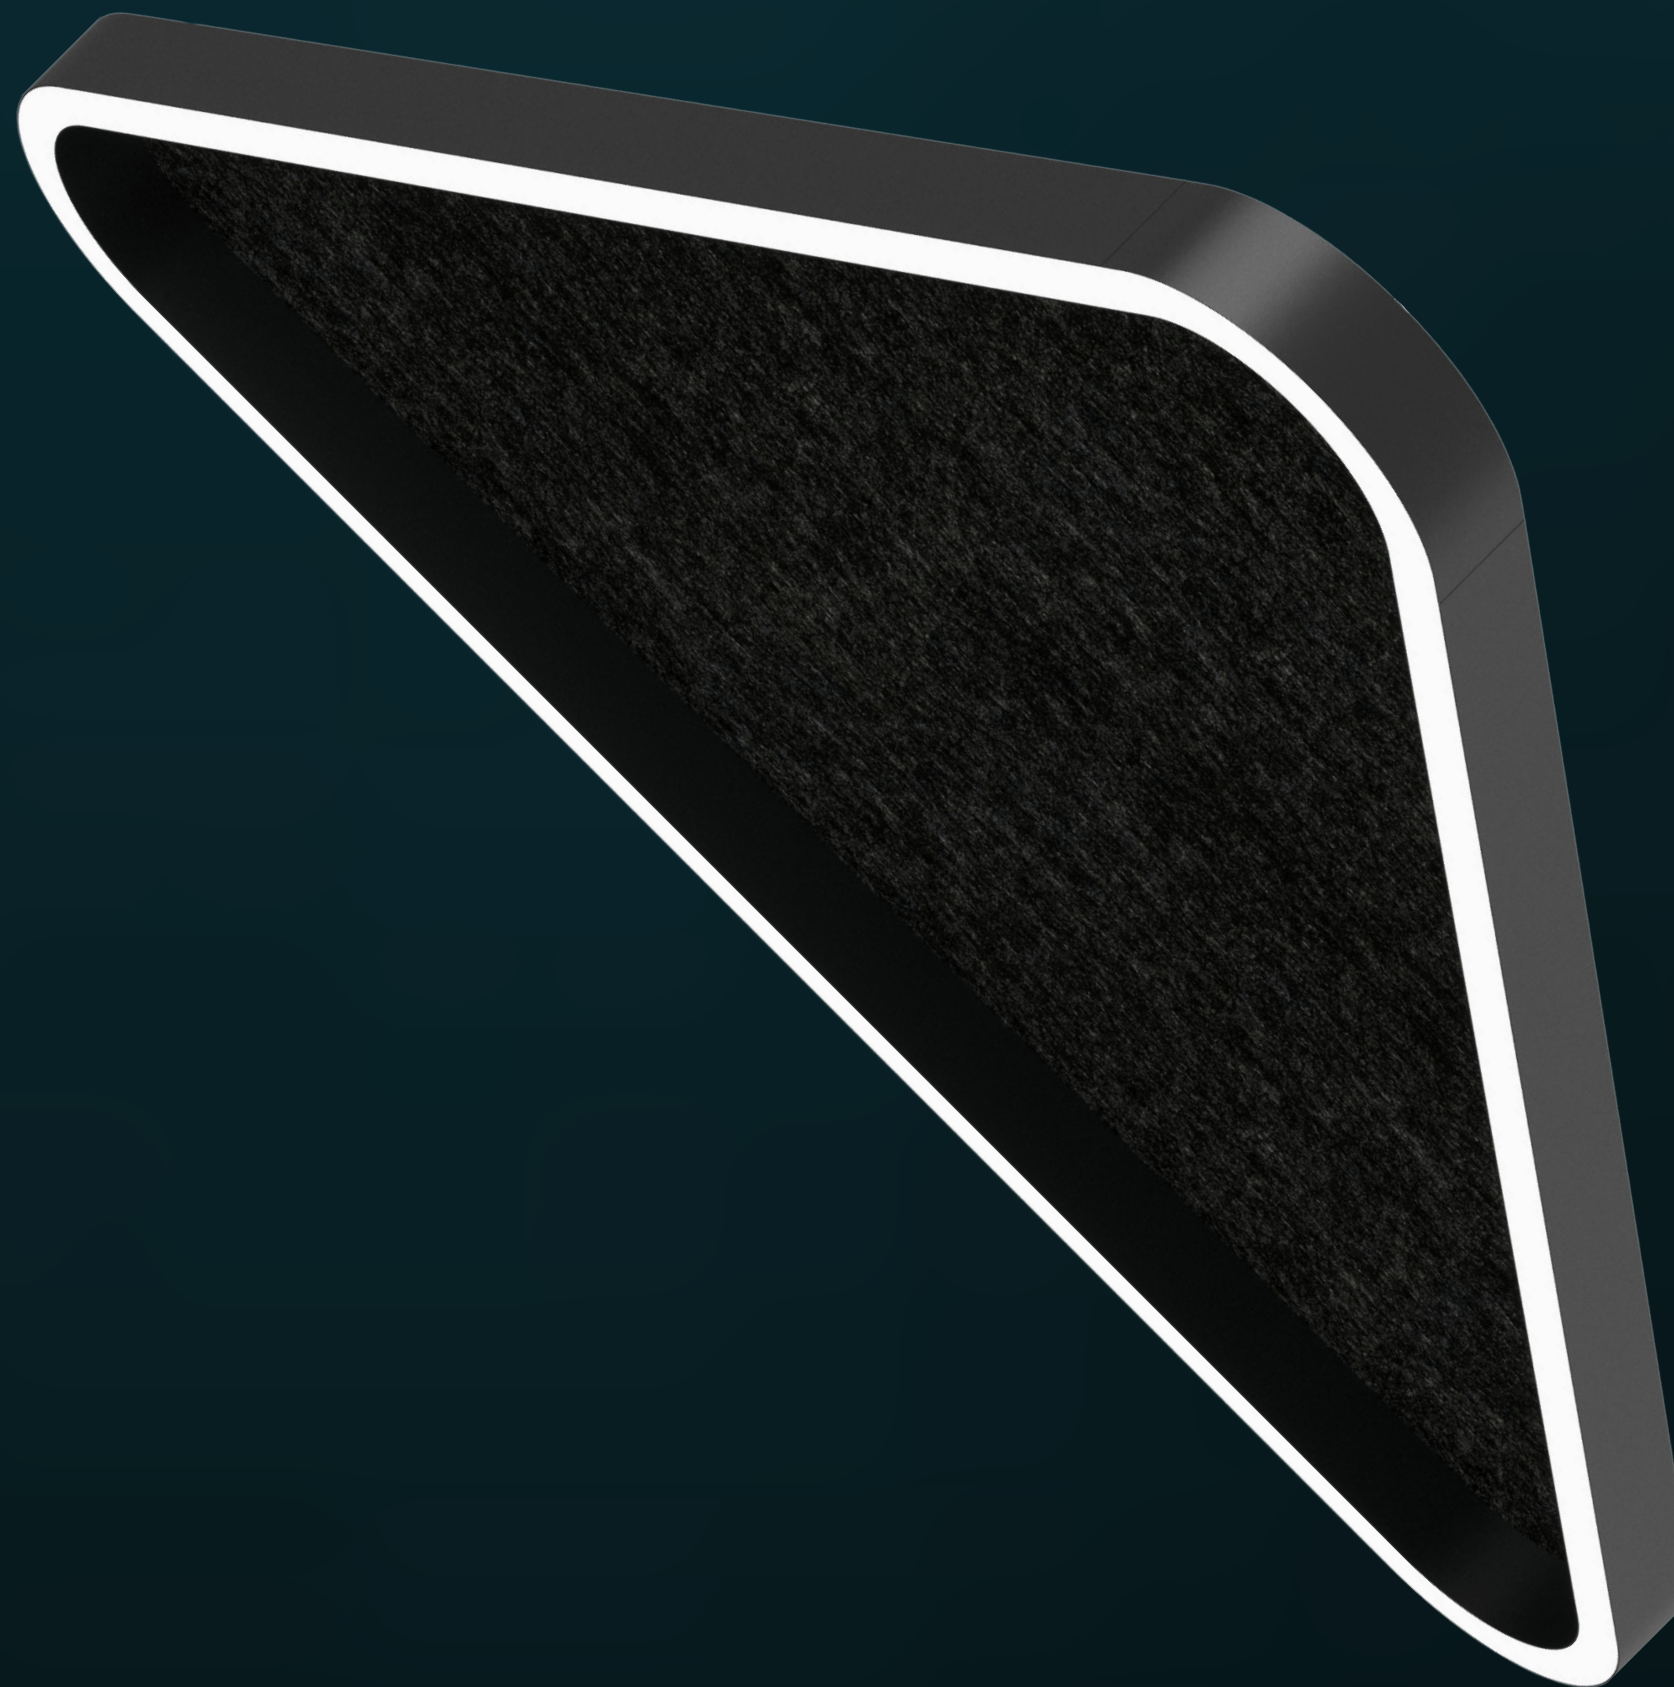

# HOUSING FINISHES

## 10 Finishes

- Black Metallic Textured
- Bronze Metallic Textured
- Copper Metallic
- Midnight Blue Metallic Textured
- Gold Metallic
- Silver Metallic Textured
- Charcoal Metallic Textured
- Red Metallic Textured
- Champagne Metallic
- White

b FELIX™

ACOUSTICS

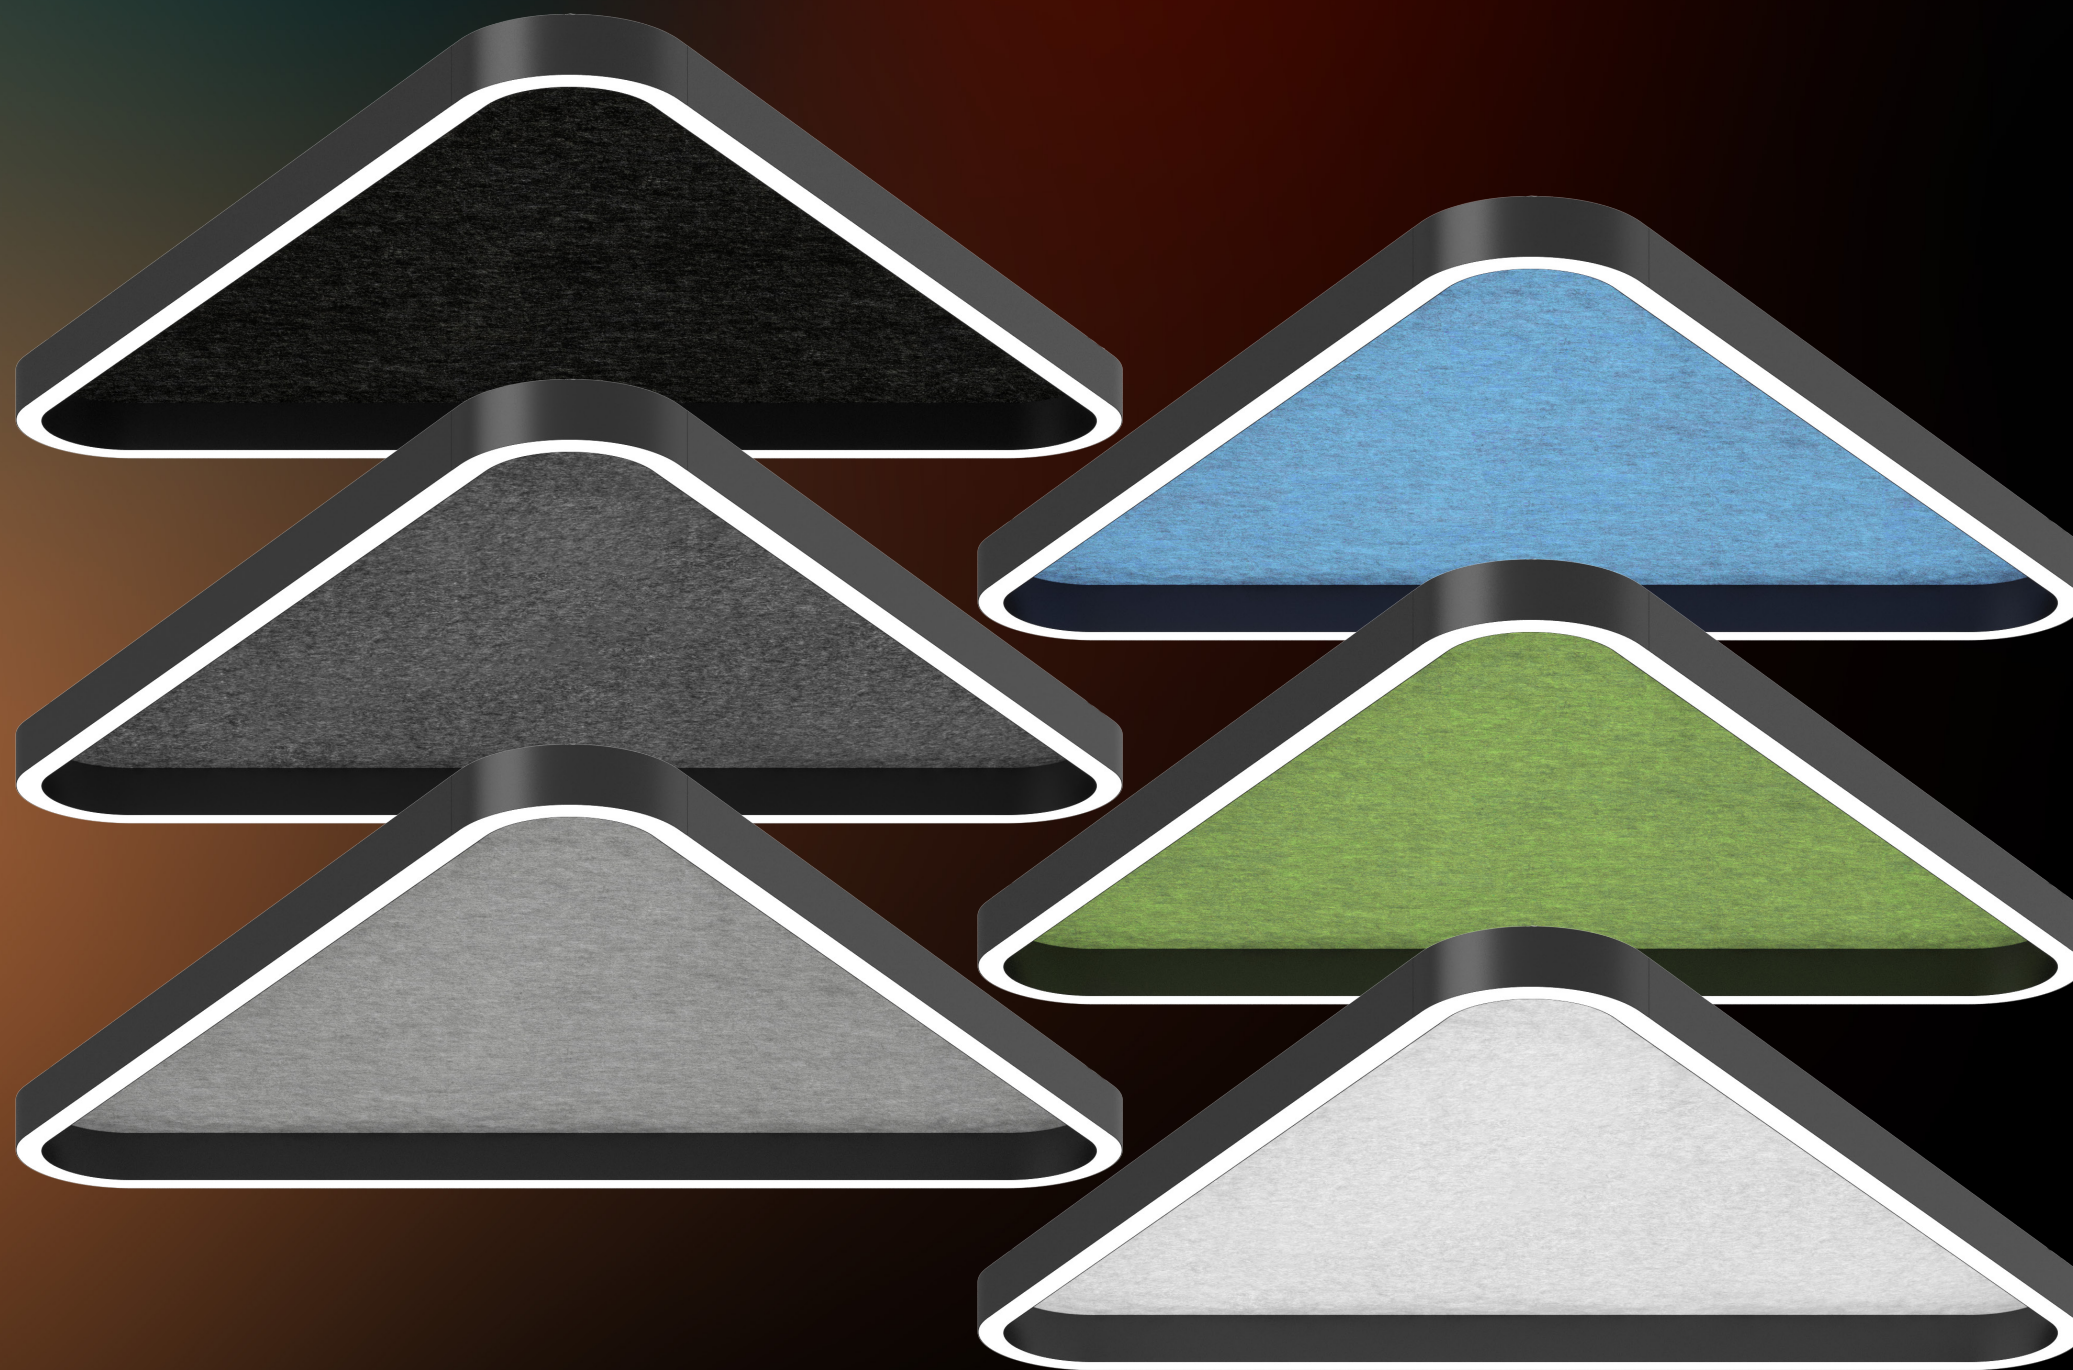

Acoustic panels effectively dampen sound in high-traffic spaces with reflective materials.

# ACOUSTIC PANELS

## 6 Colors

- Black
- Sesame Gray
- Light Gray
- Blue
- Apple Green
- White

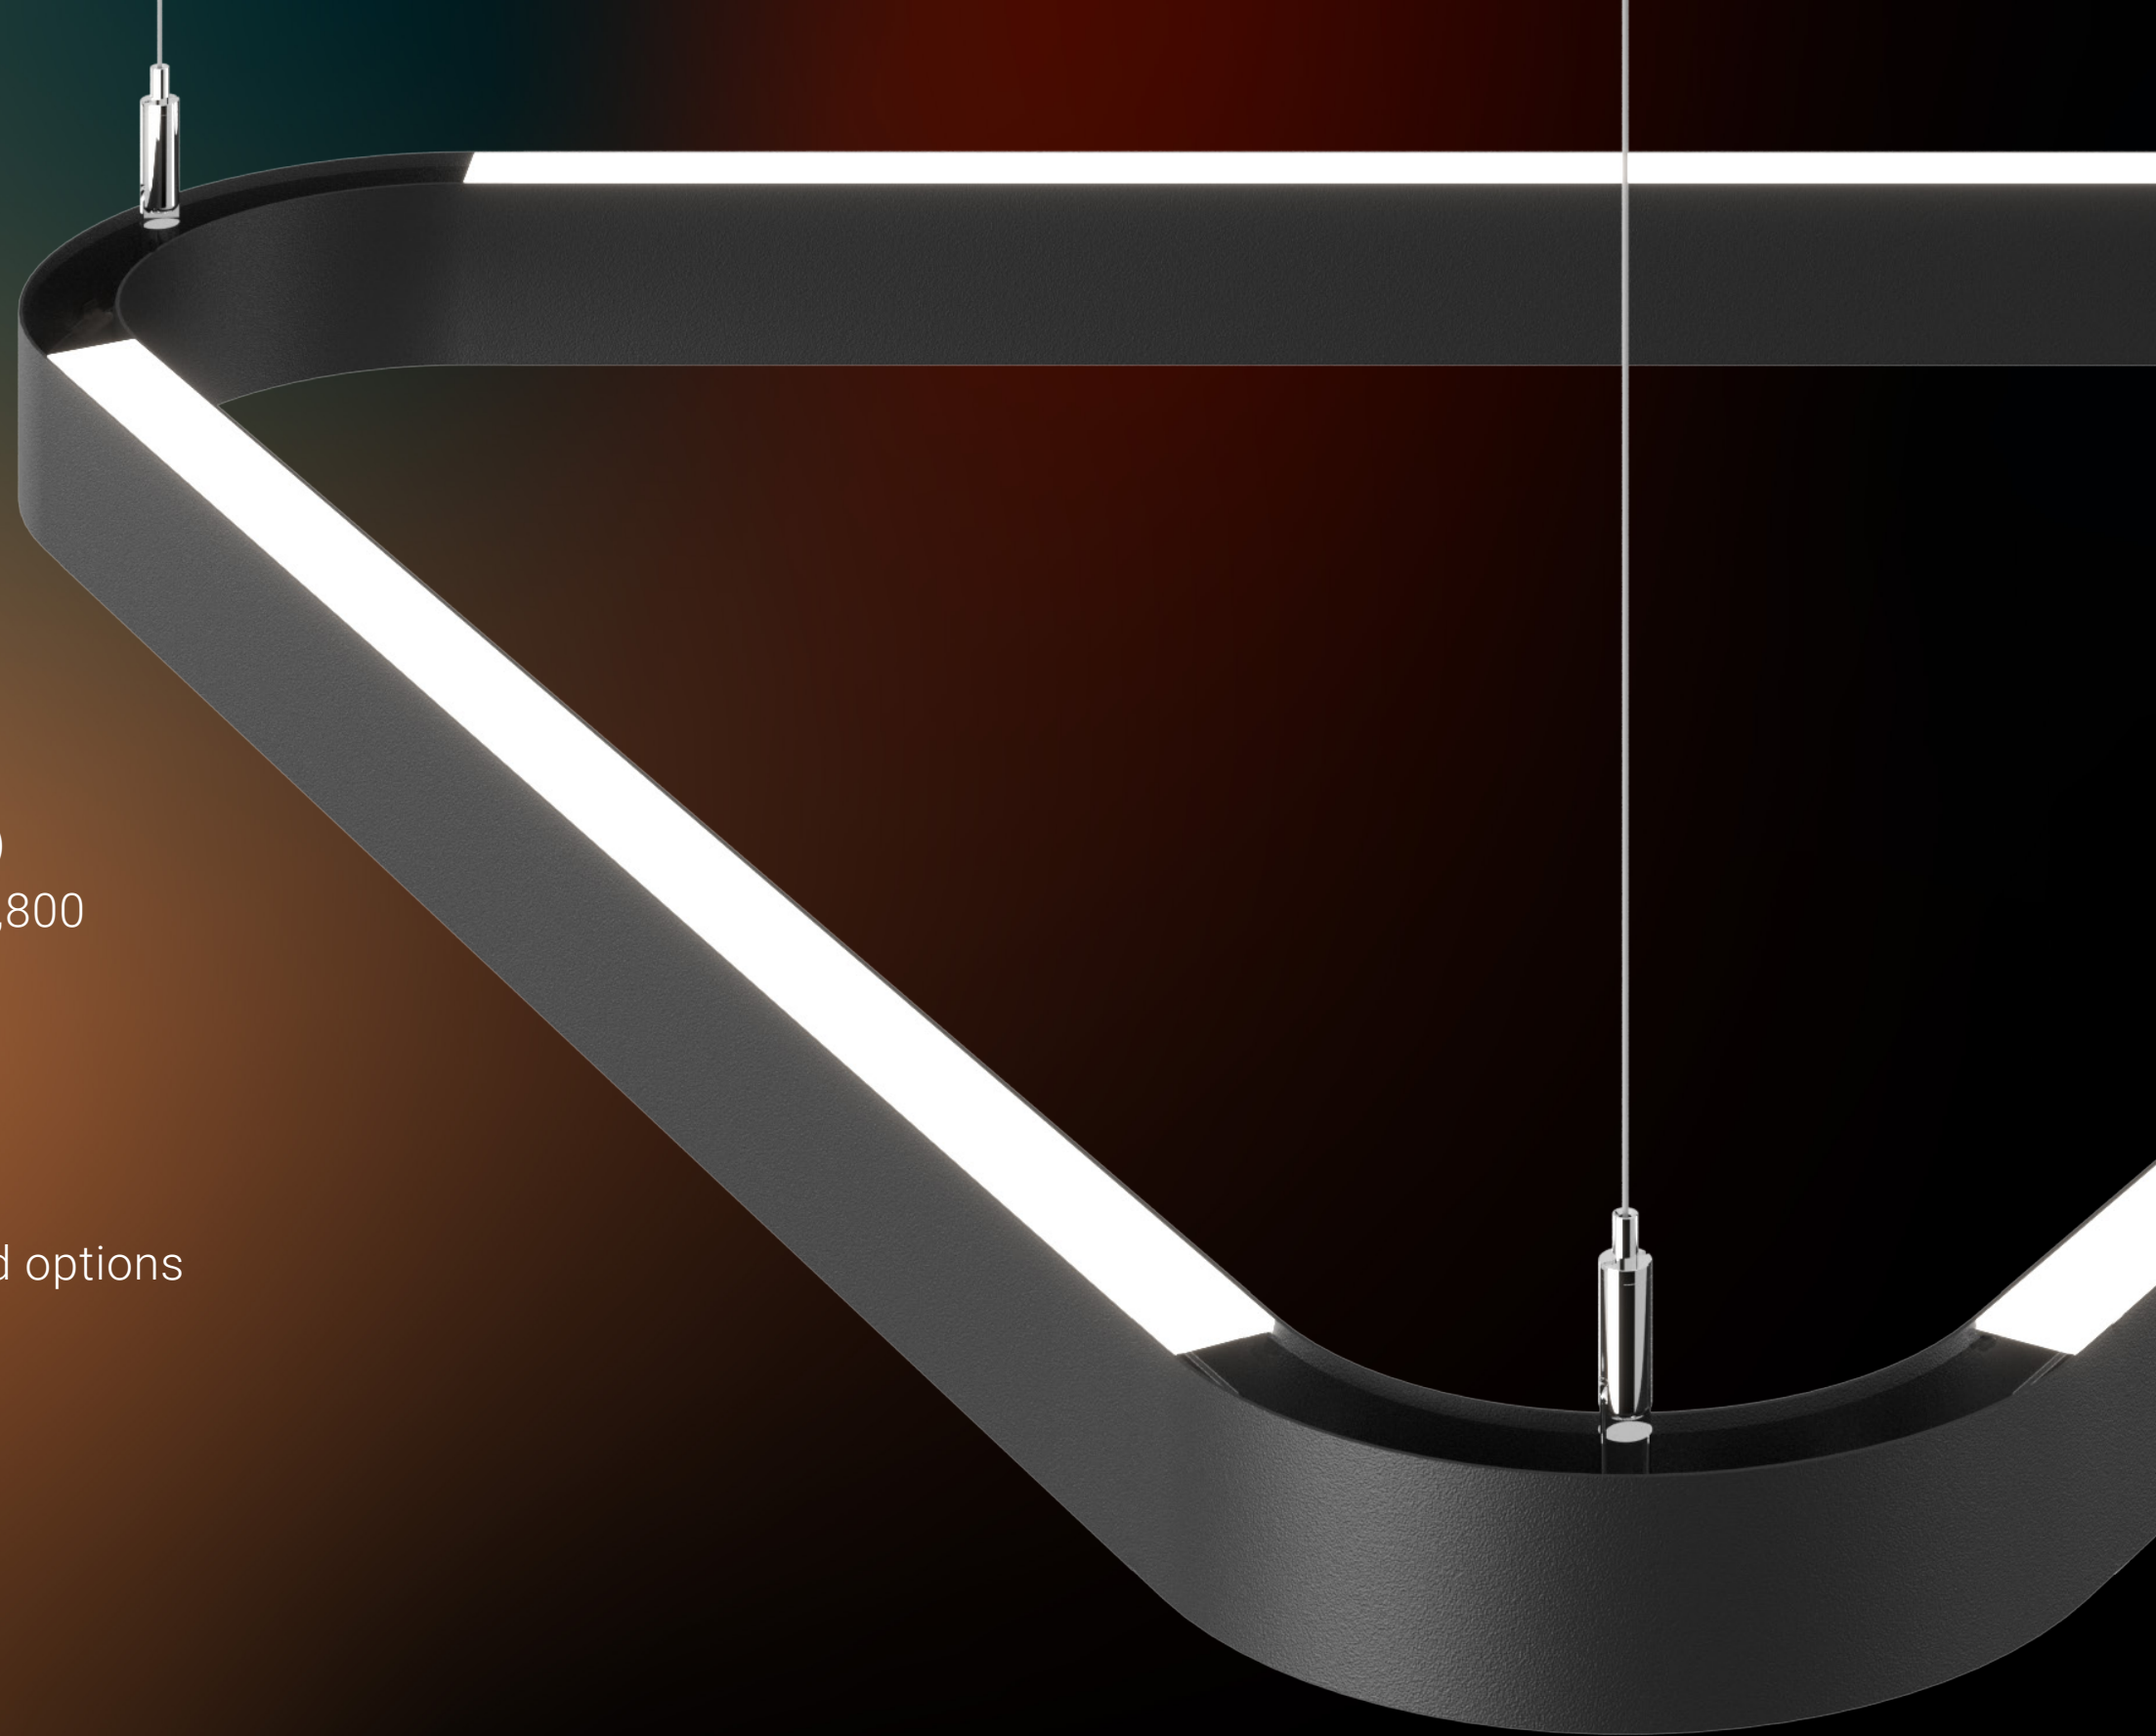

Improve the sound quality of a common area with acoustic lighting. Acoustic panels help absorb echo and reverberation associated with open-concept areas.

# TECHNICAL SPECIFICATIONS

- 5 sizes ranging from 3ft to 7ft
- Suspended and Ceiling mount
- Direct and direct/indirect (Suspended only)
- Lumen packages ranging from 2,900 to 17,800
- CCT of 3000K, 3500K or 4000K
- CRI 90+
- Emergency option available - remote only
- Suspension system options:
  - Power Over Suspension & Power Cord options
  - Vertical
  - Hub (Power over suspension only)
- Dimming options include:
  - 0-10V Dimming @ 1% and 0.1%
  - Dali Dimming @ 1% and 0.1%
  - PoE (Power Over Ethernet)

BETACALCO

Since 1941, we have held a passion for designing cutting-edge professional lighting that changes how spaces are illuminated while upholding the enduring principles of quality and craftsmanship.

Our objective is to work in lockstep with our clients by developing innovative products that meet their variegated design needs and comply with the latest energy and construction standards. Furthermore, our manufacturing infrastructure allows us to scale products and satisfy niche design requirements.

We use leading-edge wellness technologies including BIOS, Tunable White, and Dim to Warm; and employ open-source connectivity to intelligent control systems, including Power over Ethernet.

Our customer-centric approach to service and product design is the basis of our reputation and how we have become a key lighting supplier across the globe.
