

OOOOH

INTRODUCTION

OOOOH refashions traditional lighting concepts with an innovative louver system. An array of ellipses is incurved to conform to a tunnel-shaped profile, creating a subtle aesthetic and sublime lighting effect. The louver system not only tempers the starkness of the commonly exposed diffuser with an enchanting decorative feature but also enhances visual comfort by reducing glare.

FEATURES

VISUAL COMFORT

An injection-molded louver provides precise optical control, limiting glare from the luminaire. Available in 5 finishes: Black for the highest glare control, White for higher reflectance and performance, and for an interior design enhancement, satinized finishes Satin Chrome, Satin Gold, and Satin Champagne. Beyond improving visual comfort through glare reduction, the elliptical louver's soft curves add a dimension of aesthetic comfort.

OPTICAL CONTROL

In linear systems, the direct light is available with the Comfort diffuser, which offers a softer, more uniform light distribution, whereas the Asymmetric diffuser targets light for specific purposes, such as wall illumination, thus augmenting the ambient light. Additionally, for indirect lighting in linear suspension, the Batwing optic, featuring a 120° beam, casts light upwards towards the ceiling, enhancing the ambient lighting experience with reduced glare.

FINISH COMBINATIONS

The luminaire body is available in 12 finishes which were selected based on their versatility to a variety of color schemes. Metallic sheens balance out functional forms with elegance; the wood finishes ground the space with a natural aesthetic. In combination with the louver and acoustic panel finishes, a truly tantalizing luminaire can be configured.

BESPOKE

Build a luminaire specifically suited to the space requirements. Designers have multiple options for each component at their disposal, including lumen package, color attributes, light distribution, open-standard control systems, and mounting systems.

OOOOH SUSPENDED

Behind the louver system lies the Comfort diffuser, designed to deliver a soft, uniform light spread. For indirect lighting needs, the Batwing diffuser features a precise 120° beam, ensuring an even cast across the ceiling while enhancing the overall ambient light with minimal glare.

SUSPENDED OPTICS

Comfort Diffuser:

Frosted acrylic diffuser is engineered to provide better light control and softer distribution.

Asymmetric:

Skew the light toward specific tasks, like illuminating walls, thereby enhancing the ambient lighting.

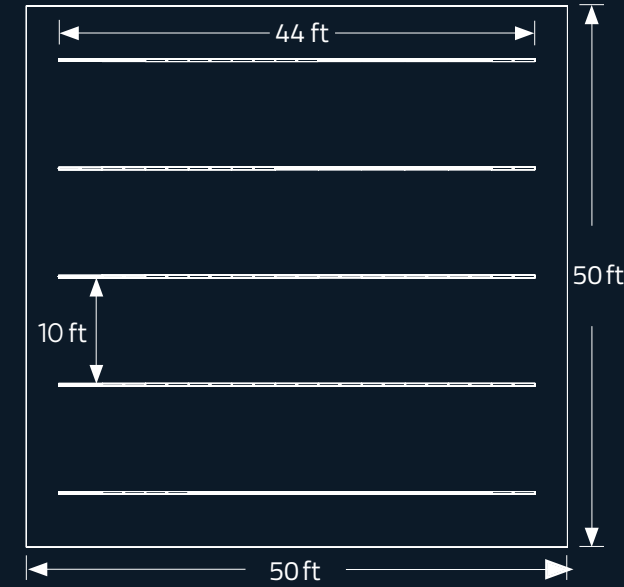

Batwing:

120° beam provides even distribution on the ceiling and contributes to the ambient light with minimal glare.

BLACKOUT PLATE

The blackout plate blocks light from illuminating unflattering ceiling areas such as ductwork. It comes in one-foot sections and can easily slide along the top of the fixture to where it is needed.

OOOOH CEILING

OOOOH combines practicality with elegance, offering high-performance lighting that suits the needs of any modern workspace. Its efficient illumination, delivering up to 128 lumens per watt, ensures a well-lit environment conducive to productivity, while its sleek design subtly enhances the office aesthetic.

WHY DECLARE MATTERS

Every year, the building industry accounts for 39% of global carbon emissions, and the health impacts of the built environment are drawing increased scrutiny. In earning a Declare label for our linear and decorative line, we're joining over 200 manufacturers by responding to the market's demand for decreased emissions and increased transparency.

BETACALCO

Since 1941, we have held a passion for designing cutting-edge professional lighting that changes how spaces are illuminated while upholding the enduring principles of quality and craftsmanship.

Our objective is to work in lockstep with our clients by developing innovative products that meet their variegated design needs and comply with the latest energy and construction standards. Furthermore, our manufacturing infrastructure allows us to scale products and satisfy niche design requirements.

We use leading-edge wellness technologies including BIOS, Tunable White, and Dim to Warm; and employ open-source connectivity to intelligent control systems, including Power over Ethernet.

Our customer-centric approach to service and product design is the basis of our reputation and how we have become a key lighting supplier across the globe.
