

S T A R B U R S T

Designed by Jacob Antoni

Starburst is a collection of kinetic pendants that when in compact form are semblant of stars which can then manually expand into a larger circle, triangle, or quad.

Starburst in its many forms can blend with both modern and organic interior designs.

The overlapping and interlacing of multiple links create contours that resemble elements of nature and can evoke feelings of well-being and positivity.

The angularity of the links and lens complements futuristic themes that communicate innovation, high-tech, and avant-garde.

Starburst is available in 3 shapes; Quad, Round and Triangle.

STARBURST QUAD

STARBURST RD

STARBURST TRI

Each shape starts as a circular arrangement and expands into a bigger quad, round or triangle.

STARBURST QUAD

STARBURST RD

STARBURST TRI

Starburst can be manually expanded and contracted after installation, allowing on-site tailoring to fit the design of the space.

Starburst Quad expands into 3 sizes, each creating a very distinctive shape.

As a single pendant, Starburst acts as an illuminated art piece.

When arranged in layers and combinations, a celestial effect is created.

The round version creates a different set of effects while maintaining the circular arrangement when expanding.

While edgy and energetic, the triangle nature is softened with the woven design of the Starburst.

Once at full capacity, the triangle can hyperextend into a trillium shape.

Starburst is a distinct luminaire that will transform any space from ordinary to extraordinary.

About Beta-Calco

Since 1941, we have held a passion for designing cutting-edge professional lighting that changes how spaces are illuminated while upholding the enduring principles of quality and craftsmanship.

Our objective is to work in lockstep with our clients by developing innovative products that meet their variegated design needs and comply with the latest energy and construction standards. Furthermore, our manufacturing infrastructure allows us to scale products and satisfy niche design requirements.

We use leading-edge wellness technologies including BIOS, Tunable White, and Dim to Warm; and employ open-source connectivity to intelligent control systems, including Power over Ethernet.

Our customer-centric approach to service and product design is the basis of our reputation and how we have become a key lighting supplier across the globe.
