

FIXTURE COMES PARTIALLY ASSEMBLED.

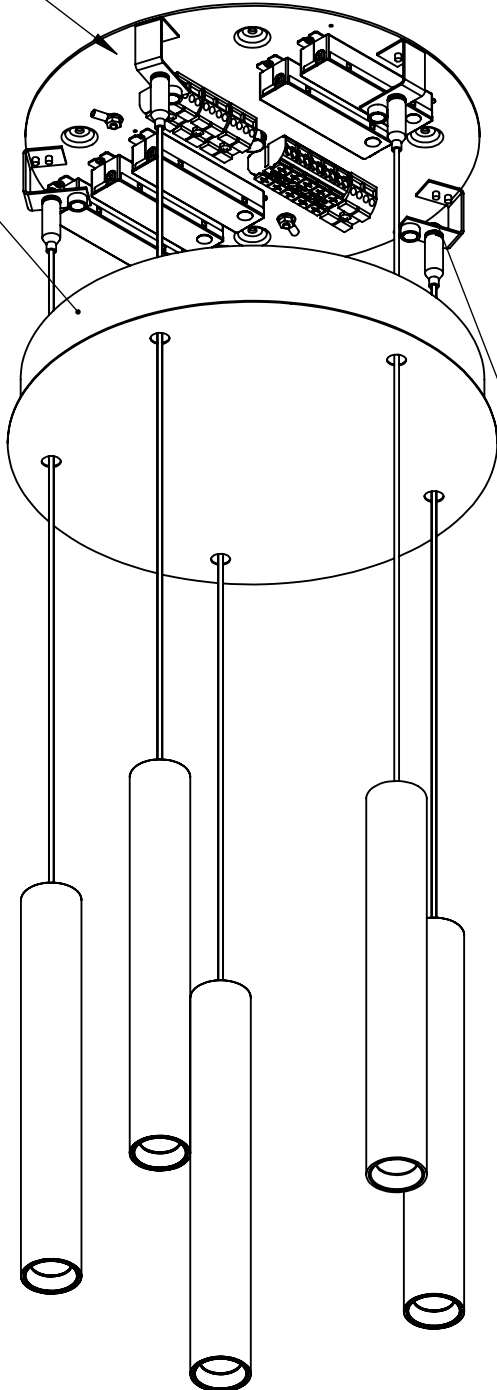

Ensure electrical circuit is disconnected before installation.

Luminaires must be installed in accordance with national electrical code and local regulation.

Ceiling Plate

Canopy

1. Attach the ceiling plate to the junction box and make all the necessary wiring connections to the terminal blocks.
2. Using appropriate fasteners (not included), attach the ceiling plate to the ceiling by the ceiling plate's mounting holes. Use all 4 indicated mounting points.
3. Secure gripper to suspension bracket using the locknut and lock ring (Fig. 1).
4. Pass the power over aircraft cable through the gripper and make all necessary electrical connections.
5. Life the canopy into place and secure with magnets.

Note: The canopy is used to cover the branch circuit/junction box.
