MANUFACTURER RESPONSIBLE FOR LABEL ACCURACY
INTERNATIONAL LIVING FUTURE INSTITUTE™ living-future.org/declare

We are pleased to announce that Beta-Calco's Decorative Series of luminaires has received a Declare label from the International Living Future Institute.

Declare is an internationally recognized transparency platform to disclose a product's ingredients and discover healthy building products. Every year, the building industry accounts for 39% of global carbon emissions, and the health impacts of the built environment continue to be the subject of increased scrutiny. In response, our clients and consumers have been demanding more transparency and tougher action on climate change and human health from companies such as ours. With our Declare achievement, we join over 200 different manufacturers representing 23 CSI specification sections in responding to the market demand for rigorous transparency.

Our Declare label shows our customers that our products are ones they can trust and strengthens our relationship with them, especially younger ones. Designers use this label to quickly select healthy and sustainable products. They also use it as a tool for advocating to their clients that our products be included in projects. Additionally, Declare provides a pathway for the product to contribute towards LBC, etc projects.
