

1 DRIVER REPLACEMENT INSTRUCTION

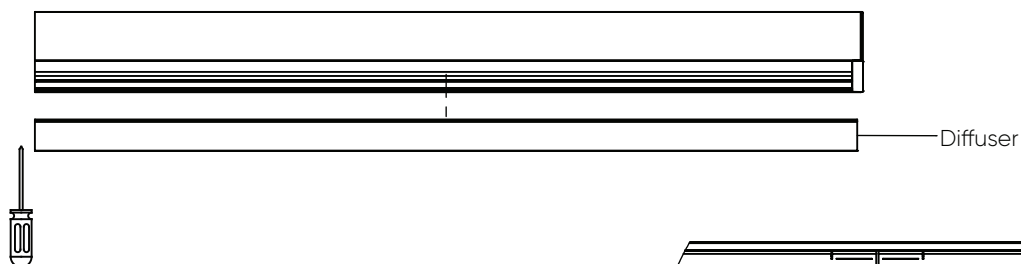

STEP 1

Remove the end cap by pulling it away from the fixture.

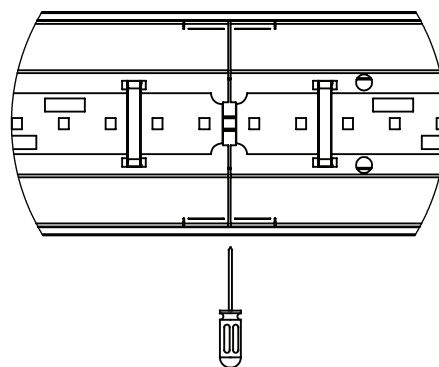

STEP 2

Remove the diffuser(s) with the assistance of a flat head screwdriver for easier removal.

STEP 3

Remove the reflector(s) by inserting a flat head screwdriver into the opening slot and then pulling it off.

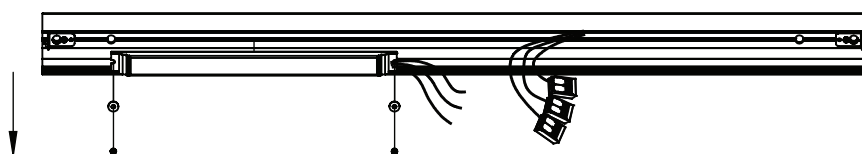

STEP 4

Disconnect wiring from the driver.

STEP 5

Detach the driver from the fixture by unscrewing it. Swap out the driver and re-make wiring connections.

STEP 6

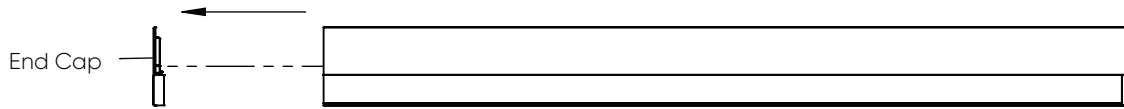

Re-install diffuser(s), reflector(s) and end cap.

2 LED REPLACEMENT INSTRUCTION

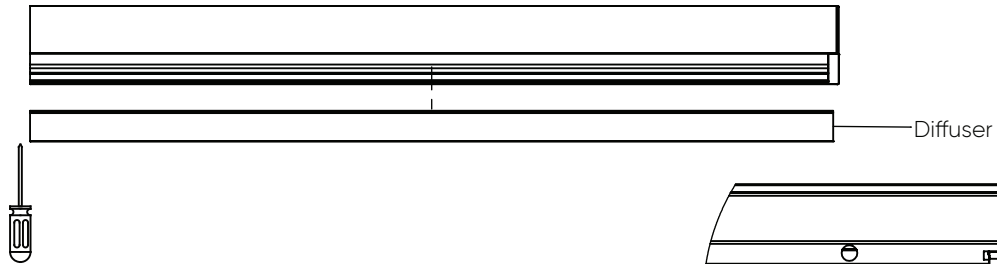

STEP 1

Remove the end cap by pulling it away from the fixture.

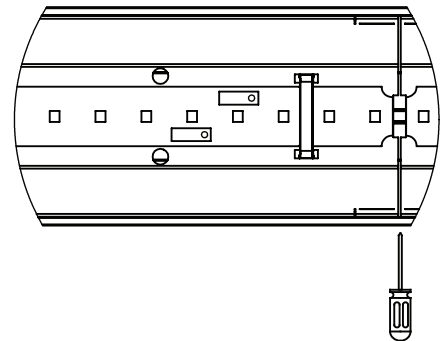

STEP 2

Remove the diffuser(s) with the assistance of a flat head screwdriver for easier removal.

STEP 3

Remove the reflector(s) by inserting a flat head screwdriver into the opening slot and then pulling it off.

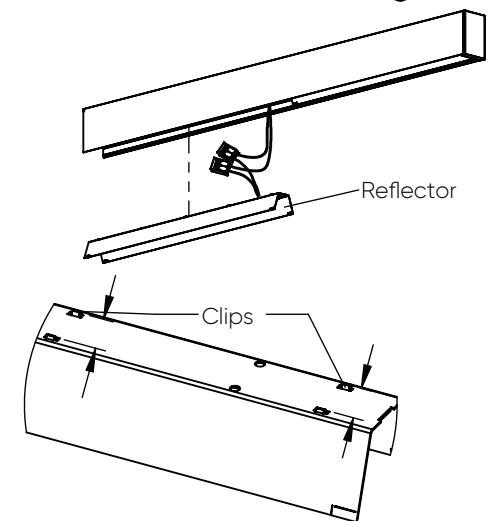

STEP 4

Disconnect wiring between reflector and fixture.

STEP 5

Replace the LED board by pushing the clips together to detach the LED and the reflector from each other.

STEP 6

Re-attach clips to the reflector and re-make wiring connections to the LED board.

STEP 7

Re-install diffuser(s), reflector(s) and end cap.
