#### 1 DESCRIPTION

**FRAMED** is a low-profile exterior light that blends with facades and enhances building architecture. The combination of center and back illumination creates a 3-dimensional effect that embellishes plain walls while complementing the exterior landscape. A combination of 2 finishes can be selected: one for the center panel, and one for the perimeter panel, adding another dimension to the impact **FRAMED** can have on your exterior design. Built to withstand the elements, **FRAMED** combines an IP65 water and dust ingress rating with a minimum starting operating temperature of -20 °C to ensure your fixture will provide optimal illumination in almost any environment.
