1 DESCRIPTION

With a super slim profile and 8 diameters ranging from 26" to 144", **MICRO RING DE** is ideal for creating sizable multi-tiered circular arrangements. The ring emits light from the inside and the outside of the ring, and can be coordinated with 5 other emission options in the **MICRO RING** family for creating multiple layers of light. Buoyant and energetic, **MICRO RING DE** is just as impactful as a single standalone piece. **MICRO RING DE** is available with an acoustic panel up to 8' in diameter. With light emission coming from the inner ring, the acoustic panel is illuminated, creating another decorative dimension. Acoustic panels are designed to absorb echo and reverberation associated with open-concept spaces, exposed concrete, open ceilings, and large windows. For a whimsical style, combine **MICRO RING** with MICRO TRIANGLE or MICRO QUAD.
