RAIL-LITE II™ - CEILING

# RAIL-LITE II™ - CEILING

The multiple spot system complements architectural elements and conceals the light sources for a discreet look. **RAIL-LITE II** sections connect solely mechanically and can run distances as required for the space with L, T, and X connections to feed light where it is needed. RAIL-LITE is ideal as a retail solution with ultimate beam control and high color rendering. The spots can be adjusted laterally within the channel to target merchandise more accurately; glare and light spill can be controlled with Hex Louver, Snoot, and Cross Baffle accessories. A CRI of 90 displays the true color of merchandise and makes them more distinguishable.

## GENERAL SPECIFICATION

### Housing

Steel and aluminum.

### LED heat sink

Extruded aluminum.

### Aperture

133.35mm/5.25"

### Sensors

Consult factory regarding sensor compatibility.

### Drivers

Constant Current driver for 120-277V (EU-240V). The driver is integral to the fixture housing.

### Mechanical

Luminaires mount directly over J box (by others - North America only).

### Approvals

Damp Rated.

### Finish

Powder coated.

### LEDs

High power, LEDs can be replaced from below.

### Reflectors

Highly reflective, specular finish.

### Sliding

Individual heads can slide a maximum of 305mm/12" left or right of its centre point.

### PoE

Rail-Lite II can integrate into your data network via Power over Ethernet (PoE) connectivity.

### Reported L70 @25°C (77°F)

> 60,000 hrs.
