Starburst is a collection of kinetic pendants that when in compact form are semblant of stars which can then manually expand into a larger circle, triangle, or quad. Starburst can adapt to either organic or cosmic interior designs. The overlapping and interlacing of multiple brackets create contours that resemble elements of nature and can evoke feelings of well-being and positivity. The angularity of the brackets and diffusers complement futuristic themes that communicate innovation, high-tech, and the avant-garde. As a single pendant, Starburst acts as an illuminated art piece. When multiplied and layered, a celestial effect is created. To learn more watch the Deep Dive in image gallery.
